
OPERATORIQ BLUEPRINT // BP-02

Agentic AI Live Dashboard Blueprint

Eight self-refreshing hub tabs. Your data, no lock-in, rendered on demand.

\$97 // Library Annual \$397/yr

LIVE

What you get inside this blueprint

Ten pages. Each one earns its place. Skim the outline below, then dive in.

02	What's Included	The 10-page map. Skim this to see the whole system.
03	Founder Checklist	What you need ready before you build your first dashboard.
04	Setup Prompt	The copy-paste prompt that scaffolds 8 hub tabs and 7 build patterns.
05	Skills and Rules	6 opinionated rules so dashboards stay trustworthy as the catalog grows.
06	Agent Overview	Every skill, what it does, what it depends on, when it runs.
07	Tools and Cost Metrics	OSS vs paid stack, setup cost, monthly run cost.
08	Security and Parallelization	Where credentials live, render lifecycle, refresh budgeting.
09	30-60-90 Day Milestones	Measurable outcomes by day 30, 60, 90.
10	Library CTA	Single, Annual, Lifetime. The other 7 blueprints in the catalog.

Have these ready before you start

Pre-flight. Have these ready before you open Cowork.

- The one dashboard you wish existed right now (pipeline, customer health, weekly metrics, hiring, support queue, content calendar, finance, other)
- A list of which connectors you already have wired (CRM, project tracker, billing, support, calendar, email, analytics)
- Login access for each of those connectors
- A rough monthly budget you are comfortable spending on connector API calls
- Brand inputs: company name, accent color, metric naming conventions you want preserved
- When you actually want to open this dashboard (daily before your morning block, weekly Mondays, before customer calls, on-demand)
- An hour for the first dashboard build (the rest are templates)
- A clear naming convention for your metrics so the dashboards don't render conflicting labels
- 30 to 45 minutes for the setup conversation
